

Dyslexia is not a *disability*,
but a *GIFT*.

Could your child be Dyslexic?

Does your Child

- ★ have particular difficulty with reading and spelling?
- ★ find comprehension difficult?
- ★ find it difficult to transfer thoughts to paper?
- ★ forget or simply does not carry out instructions when given more than one instruction?
- ★ put letters & figures the wrong way round, i.e. confuse **b's** for **d's**, and **15** for **51**?
- ★ have difficulty telling time, managing time or being on time?
- ★ have difficulty kicking or catching a ball?
- ★ have difficulty with tying shoe laces or dressing up?
- ★ have difficulties in remembering the time tables and the alphabet?
- ★ get easily frustrated & emotional about school reading or testing?

If YES, then your child could be Dyslexic.

The **GIFT** of **Dyslexia**

*"Dyslexia is not a complexity.
It is a compound of simple factors
which can be dealt with step-by-step.
At Dyslexia's root is a
Natural Ability, a Talent.
The Gift of Dyslexia is
the Gift of mastery".*

What is **Dyslexia**?

Dyslexia is an unexpected difficulty in dealing with text. It is 'unexpected' because people notice that an otherwise normal and bright child experiences great difficulty with spelling, writing, reading or maths & concentration problems.

Dyslexia affects 10 - 15 per cent of the whole population of children in schools. Only 5 out of a 100 dyslexics are recognised and get attention.

Is there a solution to the problems exhibited in Dyslexia?

YES - the Davis Dyslexia Correction Method

Ronald Davis, also a Dyslexic, has identified methods of correcting the disorientation brought about by dyslexia - the Davis Dyslexia method with a **success rate of 97%**.
